

DESIGN

Modeling and planning
for sustainable
operation
cost-efficiency !

Simple and intuitive

Easy import of your surveys

Optimize your operating plans

Reduce your costs and carbon
footprint

Interoperability with cadastral
and geological surveys

Multilingual support :
English, Spanish and French

- Connection to the Atlas platform

645, rue Mayor de Montricher
13791 AIX-EN-PROVENCE Cedex 3

DESIGN MODELING AND PLANNING MADE EASY

Topography

Import LAS STR surveys
2D/3D measurements and analysis calculation of
Rigorous volumes
Multiple DTM sections

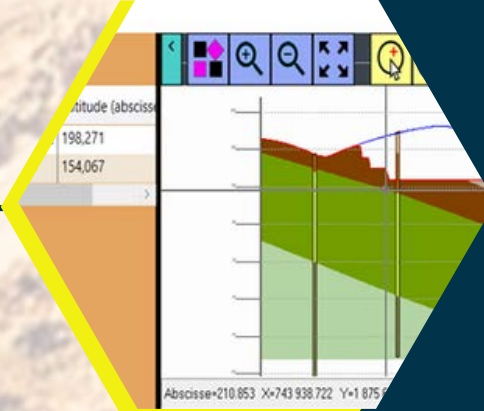

Operational design

Pit and fill design
Track design
Cost optimization

Operating plans

Taking geology into account
Balancing operating phases
Rapid search for the optimum solution

Land registry and geology

Calculating volumes per parcel
Geological volumes and grades
Immediate results
